Gypsy Caravan

Gypsies. Just the mention of the word conjures images of mystery and danger, but how much do you really know about them? Sure, most people immediately picture a nomadic, hobbled old woman wearing a head scarf and one large hoop earring who might glance at you with a piercing evil eye as she tries to steal your money or your baby. However, as Johnny Depp points out in this film during a brief interview, "what you've believed about these people has been a lie your entire life". The truth about

gypsies is far less threatening, and as it turns out, quite enlightening.

As conveyed in this riveting new documentary from filmmaker Jasmine Dellal, gypsies are more correctly identified as the Romani people, an ethnic group scattered across the globe. They are not wandering nomads, but instead have forged vibrant communities in their respective lands. They mostly share a common language and traditions, but have also integrated into their home countries to the point where there is not much that ties them together. This is evident in the range of music styles chosen for inclusion on last year's 6-week concert tour across North America that serves as the basis for this film.

The Gypsy Caravan 2006 tour united 5 gypsy bands from 4 countries, and the film follows

the tour on the road as well as on location in their homelands. Their musical styles incorporate diverse but related elements like flamenco and brass band, folk music from India, and violin music from Romania. As one

performer notes in the film, two of the only things the Roma have in common are their language and their heart, or passion, about their music. The film expertly captures this passion live on stage, but also shows glimpses of their daily lives on tour and back home. While the music might not be everyone's cup of tea, the film shines by examining the Roma passion and sense of community in spite of their different countries of origin.

As we get to know the performers, we see glimpses of their homes and families in Spain, Macedonia, Romania and India. These interludes between performances give the film its weight, as we learn to accept and care about these people rather than just enjoy their musical compositions. From the

old man who worries about the future of his family when he's no longer around to support them through his performances, to the "Queen of Gypsies" who describes her life experiences raising 47 adopted children, we see how fascinating their backstories are while concurrently enjoying their vibrant music. *Gypsy Caravan* is much more than a music documentary, shattering myths and stereotypes while providing an enriching, captivating look at the Romani people.

Gypsy Caravan is now playing in New York and opens in Los Angeles on June 29th. For additional information, please visit the [website](#) or view the trailer below:
